

# What to do...

Play this game with a partner. You will need a counter each and a coin.

1. Take turns to play.
2. Place your counters on 1.
3. Spin a coin – heads move two spaces, tails move three spaces in a clockwise direction!
4. When you land on a number you must say the number of minutes past the hour this indicates, e.g. landing on '3' you say 'fifteen minutes past.'
5. If you land on a number after '6' you must say the number of minutes before the hour, e.g. landing on '8' you say 'twenty to'.
6. Play until one player lands on '12'. They win!
7. Play again – who wins this time?

## Clock game

This activity is designed to help children learn to tell the 'minutes past' and the 'minutes to' times. If possible, relate these to digital times as you play. Point out that 'twenty to' is the same as 'forty past'.
